

List of Public Nodes

This is a list of Nodes that are open to public registrations. Please make use of the descriptions for each of these—some nodes may be better oriented for your purposes than others. Additionally: while both are suitable for general usage, as of writing Akkoma has a few more features (such as editing posts) than GoToSocial and is a bit further along in development.

GoToSocial nodes

beam.phosphor.buzz (allowing ~20 users to start)

“ beam.phosphor.buzz is a general-purpose node of the Website League that is open for registration requests. Our focus is simple: to exist as part of the broader Website League so our users may participate in it. The domain was chosen after several hours of trying to come up with with and search for interesting domains; I was thinking about the sounds that CRT monitors make when you turn them on, off, or degauss them.

lilypad.frogge.cafe (allowing ~20 users to start)

“ Lilypad is a general-purpose node in the Website League which was formed out of a desire to remain "social." Registrations are open! From shitposts to longposts, we wanna hear anything you have to share. Lilypad aims to be a place where you can bring your honest self and feel cozy and accepted.

social.minimumviable.website (allowing ~10 users to start)

“ The website league instance for doing things, if you feel like it. Friends of muffinlord, gunpla builders, scale modelers, and amateur radio operators preferred.

Akkoma nodes

akkoma.questingbeast.fyi (allowing up to 50 users to start)

“ questingbeast.fyi is an instance for fans of the mythological questing beast. It is also intended to be a chill, relaxed place that is intended for long-form content, link-sharing, blogging, and the like.

pleasetf.me (allowing up to 100 users at the moment)

“ Welcome to pleasetf.me! This is a Website League instance for furies, lovers of furry transformation, and other fun furry kinks! You don't have to love transformation to be here, but be warned - you may not be the same when you leave~

posting.isincredibly.gay (allowing 50 users to start)

“ Heya. Welcome to posting.isincredibly.gay, where you can enjoy posting AND being incredibly gay at the same time. Cool, huh? We try to keep a pretty chill vibe here. There's no specific focus happening on this instance - just hang out, be gay, ~~do crimes~~, and post along with everyone here and in the wider Website League.

weague.awful.cloud (allowing 25-50 users to start)

“ weague.awful.cloud is intended as a relatively open-registration node of the Website League with an interest in supporting client and backend extensions that improve the experience of longform writing and multimedia. Strange birds and rare creatures welcome.

Planned nodes

forest.stream (Akkoma, allowing ~100 users to start; signup list open)

“ forest.stream is a quiet place in the Website League, open to all who swear to tread carefully and leave no trace.
