GoToSocial frontends

Here are some of your frontend options for using a GoToSocial node. This isn't an exhaustive list- many Mastodon clients are also compatible with GoToSocial.

Phanpy

https://phanpy.social/

A frontend with a large number of features. See Phanpy's readme for an introduction.

Enafore / Semaphore

https://enafore.social/ and https://semaphore.social/ are lightweight clients based on the Pinafore project which was retired in 2023.
